Career-Technical Foundations Courses

Foundations classes are elective courses that prepare students to enter a Career-Technical program or just allow students to earn electives to expand their skills and horizons. Foundations classes are intended for students in grades 9 and 10, but are also open to students in grades 11 and 12 so long as the student is not also enrolled in a Career-Technical program into which the course feeds. The following is a list of the foundations courses (with course number) offered and the Career-Technical programs they lead into:
